

Hanging Baskets

A garden is fun and easy and can be beautiful and productive no matter how big or small. Buzzy® grow kits are designed so you can easily grow flowers, strawberries or herbs for your home and garden.

It is important to know what to expect from the seeds you are growing. For best results, please follow these instructions. Plants can be started indoors and moved outdoors after danger of last frost.

Directions:

- Wet the square compressed sphagnum moss with 5 cups of water.
- Wait 5 minutes. The moss will absorb the water and can be used as a liner for the basket.
- Squeeze out any excess water and cover inside of the wire basket with a layer of sphagnum moss.
- Empty the soil pouch into a separate container.
- Puncture several small holes in the bag.
- Unfold the bag on top of the sphagnum moss. This will serve as a saucer to retain water for your plants.
- Moisten the soil with water and fill the basket until ¼" below the rim.
- Save some soil for covering the seeds.
- Divide the surface into a pie (one "slice" for each variety of seed).
- Spread ½ packet of each seed variety evenly on its own slice,
- Cover the seeds with the remainder of the soil
- Water the soil.
- Place in a sunny location.

Tips:

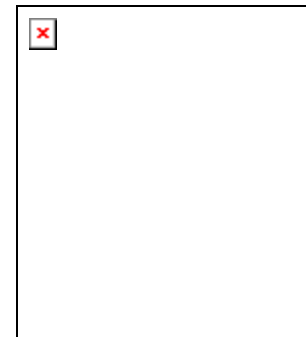

- Germination requires constant moisture.
- Do not allow the soil to become soggy or the seeds will rot.
- Use a fine mist or watering can to keep the area moist.
- If you have extra seeds, you can use the remainder to plant outside or replant them later in the container.
- Take notice of light requirements.

Annual – A flowering plant that will grow, flower and die all within the same year

Perennial - A plant that has roots that survive from year to year

Full Sun – 6 or more hours of direct sunlight daily

Partial Sun – 4 – 6 hours of direct sun daily

Flower Basket - Mature

Strawberry

Type: perennial
Light: full sun
Height (inches): 6 - 12
Germination (days): 14 - 30

Flower

Type: annuals/perennials
Light: full sun
Height (inches): 16 - 20
Germination (days): 10 - 21

Tomato

Type: annual
Light: full sun
Height (inches): 6 - 12
Germination (days): 14 - 30

Herb

Type: annuals/perennials
Light: full sun
Height (inches): 6 - 18
Germination (days): 14 - 21

WARNING:
Do not eat seeds
