

Indoor Grass

A garden is fun and easy and can be beautiful and productive no matter how big or small. Buzzy® grow kits are designed so you can easily grow decorative grass for your home and garden.

It is important to know what to expect from the seeds you are growing. For best results, please follow these instructions. Plants can be started indoors and moved outdoors after danger of last frost.

Directions:

- Add $\frac{3}{4}$ of the soil to your galvanized container.
- Open the seed packet and sprinkle the seeds evenly on the soil.
- Cover with the remainder of soil.
- Water the soil.
- Place in a sunny location.

Tips:

- Germination requires constant moisture.
- Do not allow the soil to become soggy or the seeds will rot.
- Use a fine mist or watering can to keep the area moist.
- When growing your seeds outside carefully take a nail and hammer 5 tiny holes in the bottom of the container. This will allow drainage.
- Take notice of light requirements.
- The optimum height for your grass is 3" – 4". Keep your grass looking neat by cutting with scissors or garden shears.

Annual – A flowering plant that will grow, flower and die all within the same year

Perennial - A plant that has roots that survive from year to year

Full Sun – 6 or more hours of direct sunlight daily

Partial Sun – 4 – 6 hours of direct sun daily

Rye Grass

Type: Annual

Light: full sun

Height (inches): 4

Germination (days): 7 – 14

WARNING:

Do not eat seeds
