

Wildflower Jugs

A garden is fun and easy and can be beautiful and productive no matter how big or small. Buzzy® grow kits are designed so you can easily grow flowers for your home and garden.

It is important to know what to expect from the seeds you are growing. For best results, please follow these instructions.

Directions:

- Select a sunny area.
- Prepare the ground by raking the soil and cleaning the area of weeds and debris.
- Loosen the top ¼" of soil.
- Water the soil
- Shake canister to mix the seeds and sprinkle over the prepared area.
- Rake the seeds into the soil very gently.
- Water the soil.

Tips:

- Germination requires constant moisture.
- Water daily.
- These seeds can also be grown in containers.
- Take notice of light requirements.
- Pull any weeds.

Annual – A flowering plant that will grow, flower and die all within the same year

Perennial - A plant that has roots that survive from year to year

Full Sun – 6 or more hours of direct sunlight daily

Partial Sun – 4 – 6 hours of direct sun daily

Wildflower Mixture

Nationwide Blend
