

Instructions: Farm Animal Mini Grow Pot

STEP 1

Place the pellet in a cup or bowl, add 1 tablespoon lukewarm water. The pellet will expand as it absorbs the water and turn into growing medium. Fluff the growing medium with a fork, adding more water if necessary.

STEP 2

Add 3/4 of the growing medium to the container, reserving the rest to cover the seeds.

STEP 3

Sprinkle approximately 10 seeds over the surface of the growing medium. Save any remaining seeds for replanting at a later time.

STEP 4

Lightly cover the seeds with the remaining growing medium.

Care:

WATERING

Use a fine mist or gently sprinkle water on top to moisten. Water daily with a fine mist to keep moist. A spray bottle is a perfect tool to water your plants. Do not over water.

LIGHT

Place in a warm, sunny location.

GERMINATION

Grass will sprout within 7 days.

TRANSPLANTING

Cut and style once the grass reaches 1.5" in height. Hair will grow back after cutting.

FERTILIZER
